

# A Mansion on the Hill

recorded by Hank Williams

written by Fred Rose and Hank Williams

C                    G7                    C  
Tonight down here in the valley  
                  C7                    F                    C  
I'm lonesome and oh how I feel  
                                  C7                    F  
As I sit here alone in my cabin  
                  C                    G7                    C  
I can see your mansion on the hill

                  G7                    C  
Do you recall when we parted  
                  C7                    F                    C  
The story to me you revealed  
                                  C7                    F  
You said you could live without love dear  
                  C                    G7                    C  
In your loveless mansion on the hill

                  G7                    C  
I've waited all through the years love  
                  C7                    F                    C  
To give you a heart true and real  
                                  C7                    F  
Cause I know you're living in sorrow  
                  C                    G7                    C  
In your loveless mansion on the hill

                  G7                    C  
The light shines bright from your window  
                  C7                    F                    C  
The trees stand so silent and still  
                                  C7                    F  
I know you're alone with your pride dear  
                  C                    G7                    C  
In your loveless mansion on the hill
